PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience crafting scalable web applications with React, Next.js, Vue.js, and TypeScript. I specialize in performance optimization, building design systems, and maintaining clean, maintainable architecture. I've consistently helped teams ship faster, improved user experience through load time reductions, and supported junior developers across international teams. My work includes implementing business features and integrating complex payment systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, NodeJS

Frameworks: React (17, 18+), NextJs (App Router, SSR), Nuxt, VueJs

State Management: Redux Toolkit, Effector (+Patronum), Pinia, MobX, Zustand

UI & Styling: TailwindCSS, Chakra UI (v2, v3), SCSS, ModuleCSS, Figma, Framer Motion

Tools: GitLab, Docker, Vite, Axios, Ky, Jira, Slack

AI Tools: Claude, Cursor AI, Copilot, Codex, Antigravity

Practices/Principles: Agile, Scrum, BEM, SOLID, DRY, Mobile-First.

Communication Languages: English(C1 - Advanced), Russian(Native), Kyrgyz(Native)

PROFESSIONAL EXPERIENCE

NDA Company

Jan 2026 – Present

Frontend Developer

Remote

- Develop and maintain scalable, modular architecture based on React, Next.js, and TypeScript for high-load web applications.
- Strengthened application reliability by integrating E2E and unit testing, effectively eliminating regression bugs.
- Enforce coding standards and architecture via code reviews, using Confluence for knowledge sharing and Storybook for UI development.
- Drove team-wide quality through systematic code reviews, enforcing architectural standards and engineering best practices.
- Boosted performance and maintainability by refactoring legacy code and establishing comprehensive documentation for both AI-assisted workflows and developers.

Combotech

Jan 2024 – Nov 2025

Frontend Developer

Remote

- Developed a reusable React component library and design system within a monorepo, accelerating new module development by approximately 30% across multiple projects.
- Led frontend code reviews to maintain code quality, enforce architectural standards, and reduce technical debt.
- Mentored and taught new developers, leveraging an authored developer guide to reduce onboarding time by 20%.
- Led migration of a major frontend app from Vue.js to React, significantly boosting maintainability and scalability, and speeding up future development..
- Boosted React app performance by applying memoization and targeted optimizations, achieving a 15% reduction in UI load times.

Discopus

Jan 2023 – Dec 2023

Frontend Developer

Remote

- Collaborated with designers and backend engineers to translate complex product requirements into scalable frontend architecture.
- Implemented subscription-based access logic and paywalls for an image editing module.

EDUCATION

NUST MISIS University

B.Sc., Mining and Geological Information Systems

Expected 2027

Moscow, Russia
